Here for what matters

Welcome to Unora

We're here to redefine what's possible in stoma care – for people living with change and for you, who share our commitment to helping them live the lives they deserve.

Our holistic and flexible portfolio of products and accessories is designed with protection and comfort in mind.

Combining innovative materials and decades of experience, our five material options make it easy to shape care to each person – whatever their needs and wherever they are on their journey.

And because care goes beyond the product itself, we're here for the quiet victories, the hard moments and everything in between. From the initial conversations to life after surgery, we're the partner and life-line, ready with guidance and support that helps everyone feel confident every step of the way.

With Unora, you can focus on what matters most – delivering the best care to more people.

We're here for what matters.

Product families

Our portfolio spans solutions designed to support different stoma care needs. From skin protection products made from innovative silicone to traditional hydrocolloid materials – all products have been developed to ensure comfortable and reliable care in everyday life.

Silkura®

Breakthrough silicone technology for skin health.

Breathable silicone skin protection that moves naturally with the body, delivering a secure fit that feels light and comfortable throughout the day.

- Breathable silicone barrier helps maintain the skin's natural moisture balance
- Non-reactive, skin-friendly material suitable for sensitive or fragile skin
- Lightweight, water-resistant construction that remains dry against the skin
- Gentle, consistent adhesion designed to protect skin integrity over time
- Comfortable removal without damaging the skin
- Pouch with discreet, elegant black design, 100% opaque for confidence and discretion

Stomocur®

Reliable hydrocolloid technology for everyday confidence.

Stomocur® systems combine trusted adhesion with a range of hydrocolloid based skin protection materials that help adapt care to different skin and stoma needs. In addition, this product family includes our Microskin, which consists of an ultra-thin foil.

- A selection of materials for every need, e.g., infused with alginate or materials free of animal-derived ingredients
- Proven adhesion for a secure and comfortable seal
- Designed to support peristomal skin integrity and long wear time
- Wide range of pouch shapes, sizes and convex options to support individual anatomy
- Available as a one-piece or in a two-piece Clic system

Skin protection materials

Protecting peristomal skin is central to effective stoma care. Our portfolio includes a range of skin protection materials designed to support different skin needs and wearing preferences, making it easier to share care around the individual.

Silicone

Breathable silicone skin protection that combines gentle adhesion with a secure seal.

- Breathable barrier that helps maintain the skin's natural moisture balance
- Adapts closely to the skin's surface to help create a secure seal
- Moves naturally with the body for a light, barely noticeable feel

Hydrocolloid

Trusted hydrocolloid skin protection with reliable adhesion and a secure seal to fit everyday needs.

- Established hydrocolloid formulation for dependable adhesion
- Absorbs moisture around the stoma to help maintain a secure seal
- Proven material technology widely used in everyday ostomy care

Combiflange

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

- Two hydrocolloid layers bonded together to increase absorptive capacity
- 0.4 mm thicker structure compared to hydrocolloid for enhanced adhesion
- Thin, tapered border designed to adapt to uneven skin contours

Alginate

Alginate-infused skin protection designed to absorb up to 1.5× more fluid than standard hydrocolloids for improved moisture management.

- Contains 15% alginate derived from natural seaweed
- Forms an elastic gel that adapts to any skin surface
- Helps maintain a balanced peristomal environment and supports comfort and extended wear time

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

- Ultra-thin foil with a thickness of just 0.02 mm for improved discretion
- Highly flexible design that adapts to body contours and movement
- Suitable for active lifestyles

Gelatinefrei

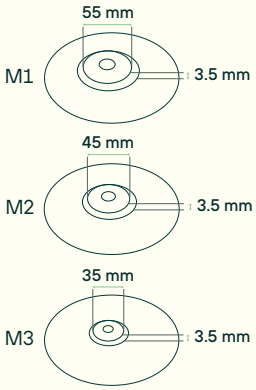
Hydrocolloid technology without gelatine or animal-derived components to support individual preferences.

- Reliable adhesion designed to maintain a secure seal
- Suitable for individuals with specific dietary, cultural or ethical preferences
- Comfortable skin protection that supports everyday wear

Convexities

Every stoma and body contour is different. When additional support is needed to help the stoma protrude and maintain a secure seal, convex baseplates can help create a more reliable fit.

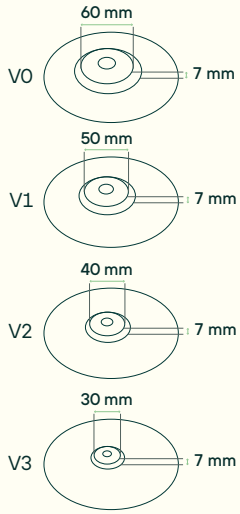
Our convex portfolio offers different convexity heights and plateau sizes, making it easier to match the right level of support to each person's needs.



Medium convex

Medium convex baseplates provide gentle support while maintaining flexibility and comfort. With a convex height of 3.5 mm, they help create a more secure fit and adapt naturally to the body's contours.

Medium convex baseplates are available in three plateau sizes with varying stoma openings.



Convex

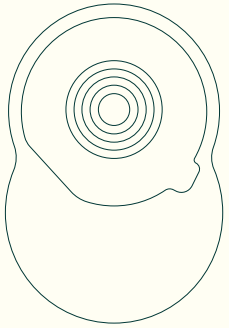
Convex baseplates provide a deeper level of support when additional assistance is needed to help the stoma protrude and maintain a secure seal. With a convex height of 7 mm, they are designed to support more challenging stoma profiles while maintaining comfort and flexibility.

Convex baseplates are available in up to four different plateau sizes with varying stoma openings.

Available in Combiflange and Alginate materials, our medium convex and convex options combine reliable adhesion with soft, flexible construction designed for comfortable everyday wear.

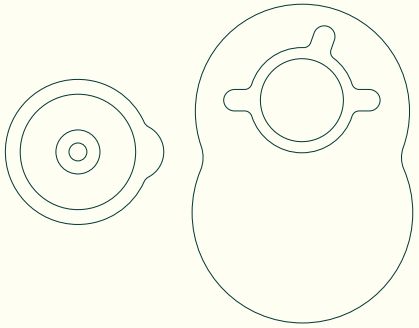
Systems

Different pouching systems support different approaches to stoma care. Our one-piece and two-piece systems allow care to be adapted to individual preferences, skin needs and daily routines.



One-piece systems

In a one-piece system, the pouch and baseplate form a single unit. This creates a simple and discreet stoma care where the entire system is changed together.



Two-piece Clic system

Two-piece systems allow the pouch to be changed without removing the baseplate from the skin. This can help reduce the frequency of barrier removal while offering greater flexibility in daily care.

The Unora two-piece system combines dependable adhesion with a secure locking ring connection, allowing pouches to be attached and removed with confidence.

- Easy-to-handle coupling system
- Audible “click” to confirm pouch attachment
- Locking ring available in three sizes (45 mm, 57 mm and 70 mm)

Product features

Our pouches are developed and manufactured in Berlin using modern production technologies and high-quality materials.

They are characterised by innovative and unique properties that meet the medical requirements of healthcare professionals and users.

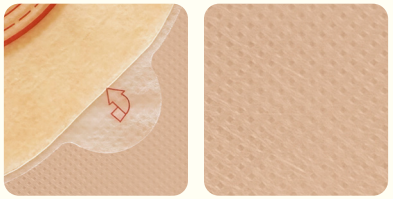
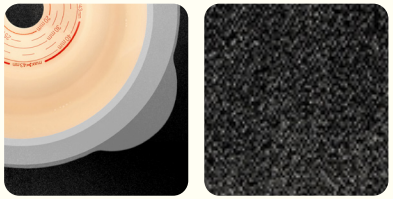
Cover material

Non-woven cover



Textile cover

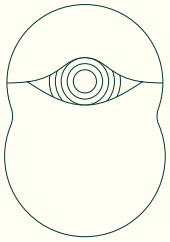


Filter

- **Colostomy** – Activated carbon filter
- **Ileostomy** – MPC filter
  MPC filter technology (Moisture Protect Composition)
  = Additional protective layer to protect the filter from liquid and support its reliable performance.

Window

The majority of our pouches feature a window. This enables easy positioning and observation of the stoma.



Colostomy

Unora colostomy solutions combine reliable filters, comfortable materials and skin-friendly barriers to help protect the peristomal area and maintain confidence in daily wear.

The Unora colostomy portfolio spans two complementary product families that make it easier to shape care around individual anatomy, skin condition and lifestyle – whether supporting established routines or helping someone regain confidence after surgery.

Silkura®

Breakthrough silicone technology for skin health.

Silicone

Breathable silicone skin protection that combines gentle adhesion with a secure seal.

Ileostomy

Ileostomy care often places greater demands on both products and skin. Higher output, moisture and frequent emptying mean that reliable sealing, skin protection and ease of use are essential.

Our ileostomy solutions are designed to support throughout the day. Patented filter technology, reliable closures and skin-friendly materials work together to provide security and reduce the risk of leakage.

Our ileostomy portfolio comprises the Stomocur® product family, offering a range of materials and pouch options to help adapt care to different anatomies, skin needs and daily routines. The “Safe and Easy” outlet can be positioned behind the cover for additional discretion.

Stomocur®

Reliable hydrocolloid technology
for everyday confidence.

Hydrocolloid

Trusted hydrocolloid skin protection with reliable adhesion and a secure seal to fit everyday needs.

Combiflange

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

Alginate

Alginate-infused skin protection designed to absorb up to 1.5× more fluid than standard hydrocolloids for improved moisture management.

Gelatinefrei

Hydrocolloid technology without gelatine or animal-derived components to support individual preferences.

Urostomy

Continuous drainage requires solutions that provide dependable flow while protecting the skin around the stoma. Comfort, security and simplicity are key in everyday urostomy care.

Unora urostomy solutions combine reliable drainage with flexible skin barriers and adaptability for drainage systems, helping protect the skin and maintain confidence.

Our urostomy range is represented by the Stomocur® product family. All stoma products feature a non-twisting pouch design and a non-return valve. For the outlet, there is a flexible choice between a “Safe” soft outlet with plug or a “Twist and Safe” tap valve for comfortable wear in everyday life.

Stomocur®

Reliable hydrocolloid technology for everyday confidence.

Combiflange

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

Gelatinefrei

Hydrocolloid technology without gelatine or animal-derived components to support individual preferences.

Special supply

Some situations call for solutions beyond everyday pouching systems. From neonatal care to complex drainage needs, specialised products help support safe and effective stoma management when standard options are not enough.

Our special supply range has been developed for medical professionals and offers specialised solutions that address these specific challenges, helping protect delicate skin, support clinical care and provide reassurance when it matters most.

Paediatric care

- Two options for premature babies up to 900 g and infants up to 5000 g
- Gentle alginate infused hydrocolloid
- Soft non-woven cover on one side, transparent back for easy observation
- Closed pouch can be cut open and used as a drainable pouch with a clip

Drainage pouches

- Large skin protection plates combined with flexible, transparent pouches and integrated access port – ideal for easy observation
- High-output drainage ports with soft outlet
- A range of shapes and sizes to meet the patients' needs

Stomocur® Premature 68

Stomocur® Premature Combi 68

Stomocur® Drainage small - large 69

Accessories

Good stoma care extends beyond the pouching system itself. Small details – protecting the skin, improving adhesion or supporting comfortable wear – can make a meaningful difference in everyday life.

Our accessories bring together practical solutions designed to complement pouching systems and support peristomal skin health, helping create a reliable and comfortable foundation for daily stoma care.
