

Environmental product declaration

In accordance with ISO 14025 and EN15804+A2

Steel reinforcement bars

SMITH STÅL

The Norwegian EPD Foundation

Owner of the declaration: E.A. Smith AS

Product: Steel reinforcement bars

Declared unit: 1 kg

тку

This declaration is based on Product Category Rules: CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 013:2021 Part B for Steel and aluminium construction products **Program operator:** The Norwegian EPD Foundation

Declaration number:

Registration number:

Issue date:

Valid to: 02.01.2029

EPD Software: LCA.no EPD generator ID: 62705

General information

Product

Steel reinforcement bars

Program operator:

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

Declaration number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 013:2021 Part B for Steel and aluminium construction products

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 kg Steel reinforcement bars

Declared unit with option:

A1-A3,A4,A5,C1,C2,C3,C4,D

Functional unit:

1 kg rebar steel from cradle to delivery to customer

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Alexander Borg, Asplan Viak AS

(no signature required)

Owner of the declaration:

E.A. Smith AS Contact person: Steve Reinertsen Phone: +4792602780 e-mail: steve.reinertsen@smith.no

Manufacturer:

E.A. Smith AS

Place of production:

E.A. Smith AS Heggstadmoen 13 7080 Heimdal, Norway

Management system:

Organisation no:

816 051 142

Issue date:

Valid to: 02.01.2029

Year of study:

2023

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Martin Sand

Reviewer of company-specific input data and EPD: Ole Horstad

Approved:

Håkon Hauan, CEO EPD-Norge

Product

Product description:

Steel reinforcement bars (ribbed steel bars) that are made out of hot rolled products, transformed into straight ribbed bars, cut and bend, mesh, and combinations of these (special welded products) by European manufacturers. Sections are prefabricated by cutting, bending and welding by a Norwegian steel manufacturer. Reinforcement steel is used in the construction buildings and civil structures. EPD represents an average value for this product based on several production sites in Norway. Variance is <10% between sites.

Product specification

Typical product composition for reinforcement steel is described in the table below. Typically it consists of more than 99% of steel scrap.

Material kg % Iron 0,98-0,99 98-99 Carbon 0,005-0,002 0,05-0,02 Manganese 0,03-0,07 0,3-0,7 Silicone 0,02 0,2

| Materials | kg | % |
|---------------|------|--------|
| Metal - Steel | 1,00 | 100,00 |
| Total | 1,00 | |

Technical data:

The product certified is in accordance with standards: NS 3576-1, NS 3576-3 and NS 3576-4

Market:

Norway

Reference service life, product

Not relevant for cradle to delivery to customer

Reference service life, building or construction works

Not relevant for cradle to delivery to customer

LCA: Calculation rules

Declared unit:

1 kg Steel reinforcement bars

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

All major raw materials and all the essential energy is included. The production process for raw materials and energy flows that are included with very small amounts (<1%) are not included. This cut-off rule does not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis. The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials allocated to the main product in which the material was used. The recycling process and transportation of recycled materials allocated to the main product in which the material was used. The recycling process and transportation of recycled materials allocated to the main product in which the material was used. The recycling process and transportation of the

material is allocated to this analysis. No other products and energy is produced at Smith Stål facility other than the declared product.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Data has been collected in accordance with clause 6.3.6 in NPCR Part A for construction products and services. Specific data are used from the manufacturer for 2023; when collecting data, efforts have been made to create data sets as comprehensive as possible. that no data used >10 years old, or that it is in accordance with 15804.

| Materials | Source | Data quality | Year |

"Reading example: 9,0 E-03 = 9,0*10-3 = 0,009" *INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
