

Continuing Professional Development Certificate

Perils of retrofitting existing assets

Date

Thursday, 30 January 2025

Time

1:00 pm – 2:00 pm

Speaker

Mark Almond GCGI MCMI Cert CII MIFPO EngTech FIFireE, Senior Technical Property Risk Engineer, Zurich Resilience Solutions

In this IIL real estate webinar, Mark Almond talks about the emerging risks including photovoltaic (PV) & electric vehicles (EV) systems, battery energy storage systems (BESS) and how adding additional materials to a building to achieve a more sustainable use increases the overall risk profile of a building going through refurbishment.

Learning Objectives

- Understand the meaning of sustainable construction and the challenges/solutions to reduce risk
- Know the types of materials/services installed as part of the retrofitting landscape
- Controls and guidance to reduce risk
