Introduction

The Dubai Virtual Assets Regulatory Authority [**VARA**] was established and authorised by *Law No. [4] of 2022 Regulating Virtual Assets in the Emirate of Dubai [Dubai VA Law]* to regulate Virtual Assets and Virtual Asset Service Providers [**VASPs**].

VARA is affiliated to the Dubai World Trade Centre Authority [**DWTCA**] and is the competent entity in charge of regulating, supervising, and overseeing Virtual Assets and VA Activities in all zones across the Emirate of Dubai, including Special Development Zones and Free Zones but excluding the Dubai International Financial Centre [the **Emirate**].

As set out in Article 5 of the Dubai VA Law, VARA has the following objectives:

1. to promote the Emirate as a regional and international hub for Virtual Assets and related services; to boost the competitive edge of the Emirate at the local and international levels; and to develop the digital economy in the Emirate;
2. to increase awareness on investment in the Virtual Asset services and products sector, and encourage innovation in this sector;
3. to contribute to attracting investments and encourage companies operating in the field of Virtual Assets to base their business in the Emirate;
4. to develop the regulations required for the protection of investors and dealers in Virtual Assets, and to endeavour to curb illegal practices in coordination with the concerned entities; and
5. to develop the regulations, rules and standards required for regulating, supervising, and overseeing Virtual Asset platforms, VASPs, and all other matters related to Virtual Assets.

The Virtual Assets and Related Activities Regulations 2023 [these **Regulations**] have been enacted with a view to advance the above objectives.

These Regulations set out the regulatory framework governing Virtual Assets and all related activities in the Emirate, including the general and specific supervision and enforcement powers of VARA. VARA may, from time to time, amend these Regulations in its sole and absolute discretion to address emerging risks and continually evolving developments in the global Virtual Asset sector. The most updated version of these Regulations will be made available on VARA's website.

Capitalised terms in these Regulations have meanings defined herein or as defined in Schedule 4.

Fundamental Principles and Goals

These Regulations are guided by the following fundamental principles for effective regulation of Virtual Assets and VA Activities—

1. **Market integrity and stability:** the market should be fair, orderly, transparent, and prevent fraud and other criminal activity. The market should be systemically safe with consideration given to prudential risks. The market can be volatile whilst still being considered to be fair and orderly. The regime should be fully FATF compliant.
2. **Consumer protection:** the regime seeks to prevent harms arising from misinformation, abuse and/or poor operational practices. Market participants are free to engage with risk, so long as they give “informed consent” about their investments and VASPs have provided them with all information necessary for such consent in accordance with all applicable laws and regulations.
3. **Technology neutrality and supportive of innovation:** the regime must not discriminate against technology, but instead against illicit or harmful activities. If an activity is not illicit, it should be possible and desirable to regulate it without banning it entirely. VARA does not regulate products or protocols as the starting point for achieving its policy goals (except in special cases). VARA does not decide which innovations are subjectively valuable or not.
4. **Regulatory resilience:** the regime must not become quickly outdated with loopholes given the fast-paced nature of the industry. The regime is principles-driven and VARA is mindful when it makes prescriptive carve-outs.
5. **Regulatory efficiency and proportionality:** enforce a regime that is not only effective [i.e. achieves the policy intent], but does so in the least burdensome way possible for both VARA and VASPs. Any burden imposed is justified relative to the potential harm that is being mitigated.

Underpinning these fundamental principles are VARA’s two primary policy goals, which are to—

1. promote the Emirate and ultimately the UAE as a safe and progressive jurisdiction worthy of attracting meaningful Virtual Asset growth and innovation, in complement with all related UAE Government programmes, and
2. position VARA and the UAE as globally trusted and respected in the realm of international law, particularly with respect to FATF compliance, and by designing a system that lends itself to interoperability and passportability.

B. Inside Information

1. Inside Information means information of a precise nature, which has not been made public, and which, if it were made public, would reasonably be expected to affect the price of a Virtual Asset or would affect the investment judgment of a reasonable individual in respect of a transaction involving that Virtual Asset. The information need not be the determining factor behind any given transaction, but should have a material impact on the decision of any reasonable investor as to whether to carry out such transaction [**Inside Information**].
2. For the purposes of Regulation VIII.B.1, information shall be deemed to be of a precise nature if it indicates a set of circumstances which exists or which may reasonably be expected to come into existence, or an event which has occurred or which may reasonably be expected to occur,

where it is specific enough to enable a conclusion to be drawn as to the possible effect of that set of circumstances or event on the price of a Virtual Asset.

3. An Entity may possess Inside Information as a result of, but not limited to—
 - a. being a member of the administrative, management or supervisory bodies of any Issuer;

Recommending, counselling, procuring or otherwise facilitating another Entity to engage in Insider Dealing, or inducing another Entity to engage in Insider Dealing arises where the Entity possesses Inside Information and it recommends, counsels or procures on the basis of that Inside Information, that another Entity—
 - a. carry out a transaction in relation to the Virtual Asset to which that Inside Information relates, or induces that Entity to carry out such a transaction; or
 - b. cancel or amend a transaction or order concerning a Virtual Asset to which that Inside Information relates, or induces that Entity to make such a cancellation or amendment.

 - a. has established, implemented and maintained adequate and effective internal arrangements and procedures to limit access to Inside Information and prevent Insider Dealing to effectively ensure that neither the individual who made the decision on the VASP's behalf to carry out a transaction in relation to a Virtual Asset to which the Inside Information relates, nor another individual who may have had an influence on that decision, was in possession of the Inside Information; and
 - b. has not encouraged, made a recommendation to, induced or otherwise influenced the individual who made the decision on its behalf to carry out a transaction in relation to a Virtual Asset to which the information relates.

2. For the purposes of Regulation VIII.E.1, it shall not be deemed from the mere fact that an Entity is in possession of Inside Information that such Entity has used that Inside Information and has engaged in Insider Dealing on the basis of a transaction where that Entity—
 - a. for the Virtual Asset to which that Inside Information relates, is a market maker or an Entity authorised to act as a counterparty, and the transaction in relation to the Virtual Asset to which the Inside Information relates is made legitimately in the normal course of the exercise of its function as a market maker or as a counterparty for that Virtual Asset; or
 - b. is authorised to execute orders on behalf of third parties, and the transaction in relation to the Virtual Assets to which the order relates, is made to carry out such an order legitimately in the normal course of the exercise of that Entity's employment, profession or duties.
3. For the purposes of Regulation VIII.E.1, it shall not be deemed from the mere fact that an Entity is in possession of Inside Information that such Entity has engaged in Insider Dealing on the basis of a transaction where that Entity conducts a transaction and that transaction is carried out in the discharge of an obligation that has become due in good faith and not to circumvent the prohibition against Insider Dealing and—
 - a. that obligation results from an order placed or an agreement concluded before the Entity concerned possessed Inside Information; or
 - b. that transaction is carried out to satisfy a legal or regulatory obligation that arose before the Entity concerned possessed Inside Information.

 - a. an Issuer;

- b. a secondary offeror of a Virtual Asset, in such quantity or value that the transaction is distinct from ordinary trading and involves a selling method based on the prior assessment of potential interest from potential investors; or
 - c. a VASP or other third party acting on behalf or on the account of an Entity referred to in Regulation VIII.G.1.a or b [**Market Sounding**].
 2. A disclosing Entity shall, prior to conducting the Market Sounding, specifically consider whether the Market Sounding will involve the disclosure of Inside Information. The disclosing Entity shall make a written record of its conclusion and the relevant reasons. It shall provide such written records to VARA upon request. This obligation shall apply to each disclosure of information throughout the course of the Market Sounding. The disclosing Entity shall keep the written records referred to in this Regulation VIII.G.2 up-to-date and in any event update them weekly.
 3. A disclosing Entity shall, before making the disclosure—
 - a. obtain the consent of the Entity receiving the Market Sounding to receive the information;
 - b. inform the Entity receiving the Market Sounding that it is prohibited from using that information, or attempting to use that information, by acquiring or disposing of, for its own account or for the account of a third party, directly or indirectly, Virtual Assets relating to that information;
 - c. inform the Entity receiving the Market Sounding that it is prohibited from using that information, or attempting to use that information, by cancelling or amending an order which has already been placed concerning a Virtual Asset to which the information relates; and
 - d. inform the Entity receiving the Market Sounding that by agreeing to receive the information it is obliged to keep the information confidential.
 4. The disclosing Entity shall make and maintain a record of all information given to Entities receiving the Market Sounding, including the information given in accordance with Regulation VIII.F.3, and the identity of the potential investors to whom the information has been disclosed, including but not limited to the Entity and the date and time of each disclosure. The disclosing Entity shall provide such record to VARA upon request.

5. Where information that has been disclosed in the course of a Market Sounding ceases to be Inside Information according to the assessment of the disclosing Entity, the disclosing Entity shall inform the recipient accordingly, as soon as possible.
6. Any Entity receiving a Market Sounding shall assess for itself whether it is in possession of Inside Information or when it ceases to be in possession of Inside Information.
7. The disclosing Entity shall keep the records referred to in this Regulation VIII.G for a period of at least eight [8] years.

H. Market Manipulation
