Egis to support the Strategic Airport Infrastructure Development Program at Bucharest Henri Coanda International Airport

Egis in Romania has been appointed by Compania Națională Aeroporturi Bucuresti S.A. (Bucharest Airports National Company) to provide consultancy support with accessing funds for ongoing implementation of the Strategic Airport Infrastructure Development Program at Bucharest Henri Coanda International Airport.

The scope of the nine-month consultancy contract is to review and update previous strategic analyses to enable optimum implementation of the Airport Infrastructure Development Program (PSDIA) approved by the government. The Strategic Airport Infrastructure Development Program focuses on creating and improving access to the airport facilities, increasing infrastructure capacity for both passengers and cargo and post processing, as well as on upgrading ancillary air transport operations at Bucharest Henri Coanda International Airport.

Henri Coanda Airport is Romania's largest airport, serving 67 external and 9 domestic destinations. As a national strategic objective, this international airport needs to be prepared for the future, from both capacity and security perspectives. The program aims to improve the quality of airport services across the board, with the goal of reaching IATA "Optimum" level. The improvements proposed will benefit more than just the airport itself, they will also create opportunities for other businesses as well as contributing to international and European security.

Egis' role is to provide updated analysis and a coherent strategy to enable financing and implementation of the actions proposed under the PSDIA. Tasks will include passenger and cargo traffic forecasts, airport capacity planning, and operational and commercial strategies. A key element will be a detailed analysis of the financing sources and planning needed to achieve the project goals. The project will also need to be assessed from an environmental viewpoint in line with EU Directives.

"We will be drawing on many years of aviation expertise both globally and in this region to achieve the objectives of the contract, and cooperating fully with the Romanian authorities", said James Hanson, General Manager of Egis in Romania. "Personally, I consider this contract both an important success and a great responsibility for our company. Having previously led Egis aviation teams based in Great Britain and worked in this field in Romania, I believe that this strategic consultancy is a natural step for Egis", he added.

Sophy Fayaud, Egis Business Development Director, for European Airports said: "We are very happy to support Bucharest Henri Coanda International Airport with its strategic development plan. Our local team in Romania will work alongside Egis aviation specialists to provide an independent study of airport capacity planning and updated project cost estimates, with a clear view of the operational stages. This work will enable Bucharest Airports National Company to continue project fundraising for the proposed infrastructure development schemes."

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is an international player active in the consulting, construction engineering and mobility service sectors. We create and operate intelligent infrastructure and buildings capable of responding to the climate emergency and helping to achieve more balanced, sustainable and resilient territorial development. With operations in 120 countries, Egis places the expertise of its 15,000 employees at the disposal of its clients and develops cutting-edge innovation accessible to all projects. Through its wide-ranging fields of activity, Egis is a central player in the collective organisation of society and the living environment of citizens all over the world.

About Egis in Romania

Present in Romania since 1996, Egis provides engineering and consultancy services for large and diverse projects all over the country. Some of the most exceptionally talented engineers are part of the Egis in Romania team and they design, supervise and manage complex and technically demanding key infrastructure projects in transport and the built environment.

Egis long-term commitment to the Romanian market led to a high-level of expertise and unique knowledge to support clients, and the key areas of expertise are: roads and highways, rail, water, waste treatment, environment and energy, urban development, aviation, building engineering.
