# Egis Appoints Ashutosh Mishra as Regional Director for Nuclear, Strengthening Leadership in Energy Transition and Low-Carbon Solutions

Egis, a leading global architectural, consulting, construction engineering, operations and maintenance services firm, has announced the appointment of Ashutosh Mishra as Regional Director for Nuclear, a key leadership role that reflects the company's growing commitment to supporting national energy strategies and sustainable development goals across the region.

With nearly 20 years of experience in the energy and infrastructure sectors—including more than a decade working within the Middle East—Ashutosh brings a strong track record in leading complex projects, building high-performing teams, and delivering tangible results. He has led major initiatives focused on policy advisory, project execution, and capacity building. His collaborative leadership style and strategic outlook have enabled him to guide projects that balance environmental objectives with commercial and operational realities.

With Ashutosh leading its nuclear practice, Egis strengthens its position as a trusted partner to governments and private sector clients navigating the complexities of the energy transition—helping them align infrastructure investments with decarbonisation targets, economic diversification, and global competitiveness.

Commenting on his appointment, Ashutosh Mishra said: "Globally, we're seeing a decisive shift toward cleaner, more secure energy systems—with nuclear playing a vital role in achieving net zero targets and broader national ambitions. As countries invest in the next generation of infrastructure, the challenge is not only technical delivery but creating energy ecosystems that are resilient, cost-effective, and future-ready. I'm excited to lead Egis' nuclear business at this pivotal time, drawing on our multidisciplinary expertise to help clients deliver projects that support both their immediate needs and long-term sustainability goals."

As countries in the region accelerate their transition toward diversified and sustainable energy systems, nuclear energy is increasingly seen as a core pillar of both decarbonisation strategies and national economic diversification visions. Egis' integrated services—spanning engineering, project management, digital innovation, and environmental consulting—offer clients a comprehensive approach that goes beyond traditional consultancy. Under Ashutosh's leadership, Egis is set to deepen its nuclear expertise and deliver solutions that balance technical excellence with policy, regulatory, and economic priorities.

Furthermore, this appointment comes as Egis continues to grow its presence across key infrastructure sectors, with nuclear energy offering important synergies alongside the company's expertise in sustainable urban

development, transportation, digital solutions, and environmental services. By embedding nuclear within its broader portfolio, Egis provides clients with seamless support across the full lifecycle of assets—from planning and approvals to operations and eventual decommissioning.

## About Egis

---

IMAGINE. CREATE. ACHIEVE.  
*a sustainable future*

Egis is an international player active in architecture, consulting, construction engineering and mobility services. We create and operate intelligent infrastructures and buildings that respond to the climate emergency and contribute to more balanced, sustainable and resilient territorial development. Operating in 100 countries, Egis puts the expertise of its 20,500 employees at the service of its clients and develops cutting-edge innovations accessible to all projects. Through its wide range of activities, Egis is a key player in the collective organisation of society and the living environment of citizens all over the world.

With 3,500 employees across 8 countries in the Middle East, Egis has delivered over 700 complex development projects, stimulating economic growth and enhancing quality of life. Ranked among the top five firms in the Middle East by Engineering News Record (ENR), Egis is committed to sustainable development. The Group's operations in the Middle East are built on strategic acquisitions and a deep understanding of local market conditions. Egis' long history of providing comprehensive engineering, consulting, and project management services makes it a trusted partner for regional governments, investors, and developers.
