

A long-exposure photograph of a multi-lane highway with several vehicles, including cars and a large truck, blurred to indicate motion. The scene is set during sunset or sunrise, with a warm orange and yellow glow on the horizon. The sky transitions from a pale blue to a soft orange. Lush green trees line the right side of the road. The overall image is partially obscured by a dark, semi-transparent graphic overlay on the left side, which consists of several overlapping circular and semi-circular shapes.

# The road experts \_

IRELAND edition 2024

50

years of experience  
in new or existing linear  
infrastructure projects

Over  
30,000

clients from the public  
and private sectors,  
and active partners

280

tunnels as part of  
engineering, procurement  
and construction  
management projects.

30,000km

of roads and motorways

10,000

engineering structures, of  
which 2,000 non-standard  
engineering structures and  
100 exceptional structures

One of the world leaders in road design, motorway management and toll system operation.

Egis is globally renowned for its excellence in project design and development, along with road infrastructure operation and maintenance.

## Egis: Creating and maintaining sustainable and resilient infrastructure

Egis is recognised throughout Europe and further within the road sector, for its innovative engineering, and the quality of its road operation activities.

We are experts in the road sector, regardless of the size or complexity of the project..

We utilise the combined talents of our experts, our award winning design standards and methods to deliver effective project management.

We have created close relationships with our partners and collaborators in numerous countries. We possess good knowledge of local infrastructure. This means we can implement a project very quickly and take it seamlessly to commercial success.

In operations, Egis offers a wide range of innovative services in the areas of user information systems, payment operations, and data collection services.

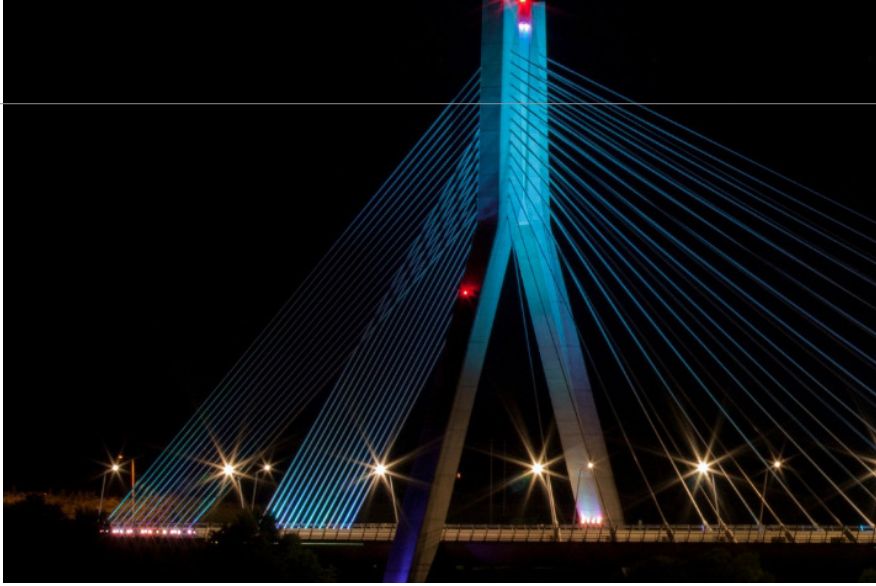

Safe roads for users: we are safety first in the design, construction and operation of roads.

### A successful project is one in which —

- processes are followed;
- budgets are controlled;
- works are managed;
- quality is monitored;
- deadlines are met;
- risks are managed.

**Ireland | 2011-2031**  
**NorthLink M1 | SouthLink N25**  
**| MidLink M7/M8**

Operations and maintenance of 120km of motorway, interurban road and three toll plazas serving 77k vehicles per day.

*Associates: BAM, Semperian, Iridium*  
*Client: Celtic Road Group*
