

2017 - 2027

south of Istanbul

Project

Two-deck road tunnel with two lanes on each deck

5.4 km long

Mission

Integrated project management
Operation & Maintenance since 2017

Eurasia Tunnel

Turkey

The project

Operation and Maintenance of a tunnel crossing underneath the Bosphorus Strait to connect European and Asian continents.

- **The goal:** to improve **traffic flowing** and **road safety**

Our value creation

- **Design : performing concurrent engineering** *to meet the short deadlines* : optimization of the project design and construction from an operation point of view, consultation with the EPC/SPV
- **Operation** : ensure the **safety of the infrastructure**, applying the European Tunnels Directive with a dedicated "safety officer"
- **Over Egis value** : with a daily traffic over 70 000 veh/day, intervention on incident/accident is critical : motorbike patrollers are specially trained for first response within 2 min.
