

Creating a sustainable future.

Egis is a major player in infrastructure engineering, consultancy, project management and operations in the Middle East and has contributed to some of the region's biggest airport, rail, water, urban mobility and urban development schemes.

Egis partners with governments, cities, industrial bodies, communities and private businesses to support this dynamic region's accelerated development and growth with an ambition to encourage and practice sustainable development truly supporting the needs of the communities.

Having delivered **15,000+ water projects over 70 years**, we have the expertise to tackle all major strategic water-related issues. From drinking water production to coastal planning to designing dams, we provide deep expertise and end-to-end services across the entire landscape.

+210
million people
supplied with
drinking water

+110
million people
given access to
essential sanitation

+35
million people
protected from
flooding

Our key services:

- R&D and knowledge transfer
- Strategy and institutional support
- Planning and master plans
- Risk and asset management
- Due diligence and audits
- Engineering design and design review
- Construction Supervision
- Program and project management

Important global issues we're helping to address include:

- **Water treatment** – delivering clean water and sanitation
- **Distribution** – providing water where it's needed
- **Water management** – managing flood risks, rainwater, water recovery and reducing leaks in networks
- **Coastal planning** – protecting our oceans and marine life
