We can advise you throughout the lifecycle of your projects – from strategy to performance, through to planning, designing and operating infrastructure both in and around the airport.

We deliver significant improvements
and meaningful results in terms of

CAPACITY,

PERFORMANCE,

RESILIENCE,

PASSENGER EXPERIENCE,

AND ENVIRONMENTAL IMPACT

AIRPORT OPERATION & MAINTENANCE

Management and operational consultancy

Revenue optimisation & Financial management

Seconded executives & HR management

Infrastructure & Real Estate development

Operation, Maintenance and Investment

Best practices sharing and development of airport network

Route & Non-aviation commercial development

BIG PICTURE PERSPECTIVE

Air Traffic Management and airspace:

with extensive capabilities in ATM, we bridge the gap between airport airside and airspace to solve capacity and performance issues.

All airport challenges:

technical, operational, commercial, development, financial, and regulatory.

All airport dimensions:

infrastructure, equipment, systems, processes, assets, and people.

All airport areas:

airside, landside, terminal, city-side including waste, water, and energy.

INDEPENDENT **INSIGHT** & **REAL-WORLD** SOLUTIONS

DEEP SECTOR KNOWLEDGE

As specialist aviation consultants and engineers who also operate 17 airports around the globe, we offer unique insight into airport challenges and opportunities.

END-TO-END

We've helped plan, design, engineer and operate some of the world's most technically sophisticated airports. Working in over 100 countries gives us an enormous breadth of experience, which we apply to your challenges.

SUSTAINABLY FOCUSSED, DIGITALLY LED

We provide independent advice to airports to help them improve resilience, reduce their environmental footprint and connect people and systems in a smarter way.

FUTURE FIRST

We bring a future-oriented approach to all our projects. Whether planning for new forms of aircraft, different travel patterns or sustainability, we design and build with one eye on the future. This means your projects will be ready to adapt to a changing world.

CONNECTING AIR TO GROUND

With extensive capabilities in air traffic management and aviation institutional issues, including policy, regulation, economic performance, safety and technology, we take a total system approach to airport issues.

We are shareholders and partners in the operation of
