

## **Egis Expands Presence in Australia's Energy Sector with Agreement to Acquire Peracon**

**Melbourne, Victoria, February 2025 – Egis has entered into an agreement to acquire Peracon, a specialist energy engineering consultancy, marking a significant expansion into the fast-growing energy market.**

Highly regarded within the Australian energy sector, Peracon specialises in power transmission, distribution networks and substation design for utility clients nationally, including work on the CitiPower indoor substations, Energy Queensland energy storage and the Western Power transmission network.

Peracon's team of more than 100 engineers and technical staff will join global consulting, engineering, architecture and operations firm, Egis. The company has been investing significantly in their Australia and New Zealand operations over the past five years, recently acquiring additional urban development, water and rail capabilities. The acquisition of Peracon is the next strategic move by Egis to increase local capability in the energy sector, enabling the expansion of their collective service offerings to new and existing clients and reinforcing their commitment to renewable energy.

In announcing the agreement, James Bennett, Energy & Sustainable Cities Director at Egis in ANZ, shared: "This is an exciting time for Egis both in ANZ and globally. The acquisition of a transmission and distribution business in Peracon will boost Egis' capability within the energy market, providing access to major HV transmission and renewable energy projects. Energy is a priority sector for Egis globally and working closely with our international teams, we will be at the front end of the Egis energy journey, accelerating decarbonisation and contributing to energy security."

Alan Goodridge, CEO of Peracon, added: "Joining forces with Egis is an exciting opportunity for Peracon. Our combined expertise and resources will allow us to better serve our clients and contribute to the development of energy infrastructure. We look forward to a successful future together."

## About Peracon

---

Peracon is an Australian based company specialising in the design of solutions for Infrastructure owners including HV Power, Telecommunication Systems and Transport. Peracon supports clients with their energy transition, helping to design the electrical networks of the future.

Peracon has over 100 employees, with a national presence around Australia working with major power utilities, mining companies and private developers in Victoria, New South Wales, Queensland and Western Australia. Peracon works closely and collaboratively with clients to strategically shape our services to achieve the best outcomes, offering strong technical capability and direct industry experience from a growing team of engineers and technical staff.

## About Egis

---

**IMAGINE. CREATE. ACHIEVE.**  
*a sustainable future*

Egis is an international player active in architecture, consulting, engineering and mobility services. We create and operate intelligent infrastructures and buildings that respond to the climate emergency and contribute to more balanced, sustainable and resilient territorial development.

Operating in 100 countries, Egis puts the expertise of its 19,500 employees at the service of its clients and develops cutting-edge innovations accessible to all projects. Through its wide range of activities, Egis is a key player in the collective organisation of society and the living environment of citizens all over the world.
