# Egis Awarded Contract by National Authority for Tunnels to Supervise High-Speed Rail Project in Egypt

Egis, a global leader in infrastructure engineering consulting and operating, is pleased to announce that it has been awarded a contract by the National Authority for Tunnels (NAT) to supervise two new electric high-speed rail (HSR) lines in Egypt. This project, undertaken in collaboration with SYSTRA as part of a consortium, will be part of the 2,000km network in Egypt.

The consortium's scope, which covers the Blue and Red Line, with a total of 1,325km and 39 stations, includes design coordination, project management, design review and construction supervision services, including the interfaces between the different groups of work, to ensure that the project is completed on time, within cost, and with the highest standard of quality. Once complete, this state-of-the-art rail network will efficiently carry both passengers and freight linking Cairo to Abo Simbel through Luxor and Aswan for the Blue Line and Safaga to Qena for the Red Line.

The HSR line aligns with Egypt's 2030 Vision, MISR2030, emphasizing the establishment of a transport system which is integral to sustainable development. It also supports the nation's future economic and social requirements and reinforces the role of transport at both regional and international levels.

**National Authority of Tunnels** commented: "We have full confidence in the collaboration of Egis and SYSTRA on the development of the High-Speed Rail line. This project is a transformative initiative for the country's vision and will profoundly enhance the quality of life for our citizens,".

Egis has collaborated with NAT on various rail projects in Egypt, including notable work on Cairo Metro Line's 2, 3 and 6, as well as the Alexandria Tram.

"We are honored to contribute to the realization of Egypt's 2030 vision 'MISR2030' through our involvement in this high-speed rail project for the National Authority for Tunnels in addition to the various projects in Egypt we are supporting, across multiple disciplines," said **Mohammad Ben Messaoud, Country Managing Director, Egis in Egypt.**

## About Egis

---

IMAGINE. CREATE. ACHIEVE.

*a sustainable future*

Egis is an international player active in architecture, consulting, construction engineering and mobility services. We create and operate intelligent infrastructures and buildings that respond to the climate emergency and contribute to more balanced, sustainable and resilient territorial development.

Operating in 100 countries, Egis puts the expertise of its 19,500 employees at the service of its clients and develops cutting-edge innovations accessible to all projects. Through its wide range of activities, Egis is a key player in the collective organisation of society and the living environment of citizens all over the world.
