Melbourne, Australia

Egis has entered into an agreement to acquire Peracon, an Australian engineering consultancy specializing in energy transmission and distribution (T&D)

Egis, a global leader in architecture, consulting, construction engineering and mobility services, continues its strong and dynamic growth strategy by announcing the decision to acquire Peracon.

This latest agreement underscores Egis' commitment to adapting and growing in key markets. By leveraging Peracon's expertise and Egis' global reach, Egis is set to make significant strides in the energy sector, driving innovation and sustainability.

Peracon is a consulting engineering firm specializing in power transmission, distribution networks, and substation design for utility customers. With more than 100 employees across six offices in Queensland, Victoria, and Western Australia, Peracon adds substantial scale and capacity to Egis.

Aligned with Egis' strong commitment to the energy transition, Peracon's capabilities complement and enhance Egis' existing operations in Australia and New Zealand, enabling expansion into the energy sector with a focus on being part of the modernization of the electricity grid, high-voltage transmission, and boost renewable energy production.

Egis is dedicated to driving innovation and sustainability in the energy sector, and this acquisition marks a significant step forward in its mission. By working closely with its international teams, Egis and Peracon will be at the forefront of the energy transition, supporting the journey to climate restoration.

Laurent Germain, CEO of Egis, said: 'This agreement to acquire Peracon is proof of our commitment to expand our capabilities and presence in key markets. By integrating Peracon's expertise with our global resources, we are well positioned to drive innovation and sustainability in the energy sector.'

Thomas Salvant, Egis' Executive Director of Energy and Sustainable Cities, added: "This agreement enhances our ability to deliver comprehensive energy solutions, supporting clients in transitioning to sustainable systems, as their expertise strengthens particularly our energy transmission and distribution capabilities and advances our mission to lead the global transition to a more resilient future."

Alan Goodridge, CEO of Peracon, added: 'Joining forces with Egis is an exciting opportunity for Peracon. Our combined expertise and resources will enable us to better serve our customers and contribute to the development of energy infrastructure. We look forward to a successful future together.'

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is an international player active in architecture, consulting, construction engineering and mobility services. We create and operate intelligent infrastructures and buildings that respond to the climate emergency and contribute to more balanced, sustainable, and resilient territorial development.

Operating in 100 countries, Egis puts the expertise of its 20,500 employees at the service of its clients and develops cutting-edge innovations accessible to all projects. Through its wide range of activities, Egis is a key player in the collective organization of society and the living environment of citizens all over the world.
