

Egis in ANZ and SICE ANZ partner to transform the future of mobility.

Melbourne, Victoria, November 2024 – Egis and SICE have joined forces in a strategic partnership to deliver cutting-edge transport solutions aimed at enhancing infrastructure and community services across New Zealand.

SICE, a leading multinational company specializing in technology integration for public infrastructure management, has been an international benchmark for over a century. Their expertise spans Intelligent Transport Systems (ITS), tunnels, mobility and smart city services, tolling, water management, security, and civil engineering.

Egis, a global leader in consulting, construction engineering, and operations & maintenance, provides end-to-end services across the lifecycle of large and complex infrastructure projects.

This strategic partnership will allow Egis and SICE to combine their extensive experience and resources to drive the delivery of landmark projects across New Zealand. Together, they aim to introduce innovative, efficient and sustainable transport solutions that transform infrastructure and positively impact the daily lives of communities.

The agreement was formally signed last Friday by Laurent Germain, Egis Group CEO, Alex Yee, Egis in ANZ CEO, Yosu Zubizarreta, SICE Australia General Manager and Adnan Meher, SICE ANZ Legal and Commercial Manager.

Tommy Parker, Advisory and Operations Executive Director at Egis in ANZ, said: "This partnership creates exciting opportunities for us to expand our capabilities and deliver transformational projects across New Zealand. Working with SICE will enable us to deliver new, advanced solutions to better meet the needs of New Zealand clients, benefiting communities and improving transport systems".

Yosu Zubizarreta, General Manager at SICE ANZ adds: "Leveraging in our complementary skillsets and common vision we aspire to drive innovation in the way we service our customers. This agreement cements our strong relationship allowing us to further invest our resources in finding new ways to streamline the delivery of end-to-end and innovative solutions."

About SICE

SICE is a leading multinational company that integrates technologies for public infrastructure management. For over 100 years, it has become an international benchmark in the areas of ITS, tunnels, transport, mobility and smart city services, tolling, water management, security, and civil engineering.

Offering a cross-cutting vision that covers all project phases, from consulting to operation and maintenance. SICE develops state-of-the-art integrated solutions and applications based on data science and artificial intelligence technologies.

SICE's activity is mainly focused on providing value-added services through the integration of different in-house and third-party technologies and systems, aiming to offer the best solutions tailored to each client and project

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is an international player active in architecture, consulting, construction engineering and mobility services. We create and operate intelligent infrastructures and buildings that respond to the climate emergency and contribute to more balanced, sustainable and resilient territorial development.

Operating in 100 countries, Egis puts the expertise of its 19,500 employees at the service of its clients and develops cutting-edge innovations accessible to all projects. Through its wide range of activities, Egis is a key player in the collective organisation of society and the living environment of citizens all over the world.
