Papeete, French Polynesia

Egis-CCISM consortium signs operating contract for the airports of Bora Bora, Raiatea and Rangiroa in French Polynesia

On Monday 16 June 2025, Moetai Brotherson, President of French Polynesia; Frédéric Mor, Director for France and Overseas of Egis' Operations and Maintenance activity; and Kelly Asin-Moux, President of the Chamber of Commerce, Industry, Services and Trades of French Polynesia (CCISM); gathered in Papeete to sign the operating contract for the three airports.

A new partnership between Egis and the CCISM has been set up to demonstrate our commitment to serving the region, as well as the renewed trust placed in the consortium by the Government of French Polynesia.

The consortium has been appointed as the operator under a seven-year public service delegation contract awarded in March. It will begin operations on 1 July 2025. The contract includes a major programme to modernise and expand the three terminals, to significantly improve service quality.

By combining Egis' airport expertise, which has been present in the region since 2010, with the CCISM's in-depth knowledge of the local economy, the consortium is further strengthening its local presence. This commitment is reflected in the establishment of a Polynesian management company and forms part of a long-term strategy that is closely aligned with the needs of the archipelago.

Frédéric Mor, Director for France and Overseas of Egis' Operations and Maintenance activity: *"We are deeply honoured by the renewed trust shown by the Government of French Polynesia in our ability to develop its airport infrastructure. This reinforces our commitment to developing airports that serve the needs of the region. We are fully focused on ensuring the successful transition of all current personnel to the new management company and on driving this remarkable project forward."*

Kelly Asin-Moux, President of the CCISM, added: *"We are delighted that this contract recognises the strength of our partnership and our shared ability to deliver an ambitious vision rooted in local realities."*

About Egis

IMAGINE. CREATE. ACHIEVE.

a sustainable future

Egis is a leading global architectural, consulting, construction engineering, operations and mobility services firm. We create and operate intelligent infrastructure and buildings that both respond to the climate emergency and contribute to balanced, sustainable and resilient development.

Our 20,500 employees operate across over 100 countries, deploying their expertise to develop and deliver cutting-edge innovations and solutions for clients. Through the wide range of our activities, we are central to the collective organisation of society and the living environment of citizens all over the world.
