Egis signs the supervision contract for the 3B2 Subsection of Braşov – Târgu Mureş – Cluj – Oradea Motorway Project

Egis signs the Supervision Contract for "Design and Build Contract for Braşov – Târgu Mureş – Cluj – Oradea Motorway, Section 3B: Mihăieşti – Suplacu de Barcau, Subsection 3B2: Zimbor – Poarta Sălajului (km 13+260 – km 25+500)", with the National Company for Administration of Road Infrastructure– CNAIR S.A.

In the first part of August, Egis signed with the National Company for Administration of Road Infrastructure a 5 million euros contract for the supervision of the design and build of a 12-km section of Braşov – Târgu Mureş – Cluj – Oradea Motorway, between Zimbor and Poarta Salajului.

As part of the Government Program for development of national motorways, Braşov – Târgu Mureş – Cluj – Oradea Motorway will provide a direct link between Romania and the Central and Western Europe, helping to strengthen transport infrastructure to enhance logistics and increase tourism. As well, the construction of this motorway is expected to generate development of the crossed areas and decrease in air pollution in the inhabited areas which will be rendered free of transit traffic.

"This motorway has an important strategic impact for Romania, with several sections already open and several others under construction. This particular contract represents a new section but also a continuation of Egis' involvement in the motorway to ensure that we can capitalise on all the knowledge and expertise from neighbouring sections to minimise the risks and maximise the progress. Our engineers, based in Zimbor, have a wealth of experience ideally suited to this complex section and we're very grateful to have secured their continuing commitment and involvement in this project", said Manuela Copcea, Manager of Supervision and Project Management Department at Egis in Romania.

The contract shall cover the provision of high-quality supervisory services to ensure the Contractor complies with contract obligations, including correct use of funds, and optimal duration, cost and overall quality.

Subsection 3B2 is designed for a speed of 120 km/h. It starts at intersection of the motorway with DN 1G km 13+260 (Huedin - Zimbor - Tihau (DN 1G)) and crosses hills and valleys heading North to the intersection with DJ 108A (Romanasi - Agrij), West of Poarta Salajului. The end point of subsection 3B2 will be temporarily arranged for connection with other roads to be prepared for connection to the future subsection 3B3, Poarta Salajului – Zalău motorway.

The duration of design & build supervision is 36 months to which the warranty period adds up to a total of 160 months.

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is an international player active in the consulting, construction engineering and mobility service sectors. We create and operate intelligent infrastructure and buildings capable of responding to the climate emergency and helping to achieve more balanced, sustainable and resilient territorial development. With operations in 120 countries, Egis places the expertise of its 17,000 employees at the disposal of its clients and develops cutting-edge innovation accessible to all projects. Through its wide-ranging fields of activity, Egis is a central player in the collective organisation of society and the living environment of citizens all over the world.

About Egis in Romania

Present in Romania since 1996, Egis provides engineering and consultancy services for large and diverse projects all over the country. Some of the most exceptionally talented engineers are part of the Egis in Romania team and they design, supervise and manage complex and technically demanding key infrastructure projects in transport and the built environment.

Egis long-term commitment to the Romanian market led to a high-level of expertise and unique knowledge to support clients, and the key areas of expertise are: roads and highways, rail, water, waste treatment, environment and energy, urban development, aviation, building engineering.
