Kuwait

Egis to Facilitate the Phase 1 Completion of Mubarak Al-Kabeer Port in Kuwait

Egis has been appointed to provide project management and construction supervision for the completion of Phase 1 of the Mubarak Al-Kabeer Port, one of Kuwait's most strategically important national infrastructure projects. The company, a global leader in architecture, consulting, construction engineering and operations and maintenance, will ensure the project fulfils the Ministry of Public Works' objective to bring the port to full operational readiness, enabling it to serve as a key trade gateway for Kuwait and the wider Upper Gulf region.

Located on Boubyan Island, Mubarak Al-Kabeer Port has long been envisioned as a cornerstone of Kuwait's future trade and logistics network. The quay structures and backland reclamation for Phase 1 were completed in 2014, establishing the physical foundation of the port. The current phase focuses on completing the remaining marine, onshore, and operational works required to bring the port into full service for the first time, transforming a strategic asset into a functioning gateway for regional and international trade.

Under the Engineering, Procurement and Construction (EPC) contract led by China Communications Construction Company (CCCC), Egis will provide integrated oversight across the remaining Phase 1 works, including onshore and offshore construction, marine structures, port basin and channel works, utilities, operational buildings, and commissioning activities. The scope is designed to ensure that the port is completed safely, efficiently, and to the highest international standards.

China Communications Construction Company said: "Mubarak Al-Kabeer Port reflects a long-term national vision that requires world-class technical governance. We have integrated Egis into this project to leverage their deep expertise in independent design audit and construction oversight. Their role is vital in ensuring that every element of the remaining works is aligned with the standards, systems, and operational requirements expected of a major international port, in line with Kuwait Vision 2035."

Egis' role includes project management, construction supervision, contract administration, schedule and cost control, health and safety leadership, and structured support through testing, commissioning, and handover. Particular emphasis will be placed on governance, transparency, and risk management to protect long-term operational performance.

Khaled ElMir, Country Managing Director, Egis in Kuwait, said: "Mubarak Al-Kabeer Port is critical as it sits at the intersection of Kuwait's economic ambition and its responsibility to future generations. Our role is to help ensure that when the port opens, it does so with systems, processes, and confidence fully in place."

The company brings extensive international experience in complex port and marine developments, supported by established ISO-certified management systems and regional delivery capability. The project team will work in close coordination with the Ministry of Public Works and CCCC, embedding early technical studies into design review processes and maintaining continuous oversight from mobilisation through final handover.

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is a leading global architectural, consulting, construction engineering, operations and mobility services firm. We create and operate intelligent infrastructure and buildings that both respond to the climate emergency and contribute to balanced, sustainable and resilient development.

Our 22,000 employees operate across over 100 countries, deploying their expertise to develop and deliver cutting-edge innovations and solutions for clients. Through the wide range of our activities, we are central to the collective organisation of society and the living environment of citizens all over the world.

With 3,500 employees across 8 countries in the Middle East, Egis has delivered over 700 complex development projects, stimulating economic growth and enhancing quality of life. Ranked among the top five firms in the Middle East by Engineering News Record (ENR), Egis is committed to sustainable development. The Group's operations in the Middle East are built on strategic acquisitions and a deep understanding of local market conditions. Egis' long history of providing comprehensive engineering, consulting, and project management services makes it a trusted partner for regional governments, investors, and developers.
