

15 Minute City

Embrace a neighborhood where everything you need is around the corner

'15-minute City'

is a decentralized urban planning model where neighborhoods provide all the essential services and facilities for living and working, allowing residents to meet all their needs within 15 minutes walking, biking, or using public transport.

Principles

Ecology: Support a greener and more sustainable city.

Proximity: Live with reduced distance to other activities.

Solidarity: Create links between people.

Participation: Involve citizens in the planning process.

Fostering 15-minute Cities

Strong stakeholder buy-in & support

Compact & well-planned urban design

Enabling regulation & policy framework

Mixed-use & diversity of services

Citizen participation in planning process

Active mobility services & infrastructure

“The golden rule of the 15-minute city is that every square meter that is already built should be used for different things.”

Carlos Moreno

“15-minute city” model theorist

'15-minute city' in Asia

Singapore's Model of Success

Singapore exemplifies the 15-minute City through dense, mixed-use neighborhoods that seamlessly integrate amenities, services, and employment opportunities. Its efficient public transport and sustainable urban design—including ample green spaces and pedestrian-friendly pathways—enable residents to meet their daily needs within a short stroll.

Adopting the 15-minute City model goes beyond spatial proximity; it demands a cultural shift and lifestyle change for residents. Engaging all stakeholders and citizens is paramount for success.

Your Partner in 15-minute Cities

Egis is uniquely positioned to support the realization of 15-minute Cities across Asia through:

Expertise in Sustainable Mobility & Land Use

Emphasizing active mobility, helping cities design transportation systems that prioritize walking, cycling, and other sustainable modes of transport.

Urban Planning & Design

Creating comprehensive urban plans that integrate mixed-use developments, green spaces, and essential services to foster vibrant, accessible communities.

Stakeholder & Community Engagement

Engaging with stakeholders and local communities throughout the planning process, ensuring that their needs are considered in decision-making.

Supporting Policy Framework & Reforms

Assisting governments and organizations in developing policies aligning with the goals of sustainable urban development, promoting frameworks that facilitate transition to livable cities.

IMAGINE. CREATE. ACHIEVE.
