France

Egis to operate Hungary's M6 Motorway until end of concession

Having operated the motorway since its commissioning in 2010, Egis secures an additional 13 years of activity following two previous six-year renewals. The concessionaire's decision reflects the quality of service delivered, the actions undertaken, and the strong partnership built over the years.

Renewed trust

Egis is pleased to announce the renewal of its operations contract for Hungary's M6 motorway. Signed on August 26, 2025, this renewal marks a new chapter in the company's successful collaboration with M6 Tolna Autópálya Koncessziós Zrt. The project was originally designed to include two operational periods, not just one. Egis is proud of its ability to maintain its position and presence in a competitive environment.

"This contract, which will run until July 15, 2038, is a testament to our partners' continued confidence in the quality of our work and our commitment to operational excellence," said **Pierre-Yves MASSILLE, CEO Consulting & Operations, Egis.**

"Over the years, Egis has consistently demonstrated rigor, professionalism, and responsiveness, confirming its legitimacy," added **Marc HÖRNIG, CEO of M6 Tolna Autópálya Koncessziós Zrt.**

A unique model

The M6 motorway stretches 65 km (2x2 lanes) between Dunaujvaros and Szekszard, south of Budapest. It features 8 interchanges, 58 bridges (including 6 viaducts), 2 rest areas, and a maintenance center.

Egis contributed to the financing of the motorway's construction from 2008 to 2010 and is a minority shareholder in the concession company M6 Tolna Autópálya Koncessziós Zrt, alongside majority shareholder Aberdeen and the European Investment Bank.

Egis is the majority shareholder of the operations and maintenance company M6 Tolna üzemeltető Kft.

This success also confirms the relevance of Egis' unique model, which brings together engineering and operations within a single group.

About Egis

IMAGINE. CREATE. ACHIEVE.
a sustainable future

Egis is a leading global architectural, consulting, construction engineering, operations and mobility services firm. We create and operate intelligent infrastructure and buildings that both respond to the climate emergency and contribute to balanced, sustainable and resilient development.

Our 22,000 employees operate across over 100 countries, deploying their expertise to develop and deliver cutting-edge innovations and solutions for clients. Through the wide range of our activities, we are central to the collective organisation of society and the living environment of citizens all over the world.
