BRICKLIVE SUPERSIZED CREATURES

Supersized Creatures is an exciting tour that showcases some of the worlds most fascinating creatures scaled up to form giant stunning models using toy bricks.

The tour contains over 20 large models and displays ranging from Tarantulas and a swooping kingfisher all the way through to a super-sized spitting snake. Visitors can experience these amazing creatures on an epic scale that is bound to impress and wow.

As visitors tour amongst the wonderful variety of models they will have numerous Selfie Zone opportunities. Some models are enhanced with audio and lighting effects adding that extra wow-factor

The models can be used by customers to create a trail around their venue. Each model comes with an ID card explaining key facts about the model such as brick count and how many hours it took to build. A trail competition can be created from these ID cards.

MODELS

AMERICAN KESTREL

MODEL STATISTICS

Dimensions: 132 x 108 x 198cm (LxWxH)

Brick Count: 56,302 bricks

Hours to Build: 281
