About cookies

What are cookies?

Cookies are small data files sent by a website's server to a web browser, processor memory or hard drive and stored there. They can be used for a range of different purposes, such as customising a website for a particular user, helping a user navigate a website, improving that user's website experience, and storing that user's preferences and login information.

Essential and non-essential cookies

Cookies can be classified as either 'essential' or 'non-essential'.

Essential cookies: these are cookies that are either:

- used solely to carry out or facilitate the transmission of communications over a network; or
- strictly necessary to provide an online service (e.g. our website or a service on our website) which you have requested.

Non-essential cookies: these are any cookies that do not fall within the definition of essential cookies, such as cookies used to analyse your behaviour on a website ('analytical' cookies) or cookies used to display advertisements to you ('advertising' cookies).

Session and persistent cookies

Cookies can be classified as either 'session' or 'persistent', depending on how long they last after they are placed on your browser.

Session cookies: session cookies last for as long as you keep your browser open. They expire when you close your browser.

Persistent cookies: persistent cookies expire at a fixed point in time or if you manually delete them from your browser, whichever occurs first.

Other technologies

Web beacons

We also embed web beacons in our marketing emails. Web beacons are small GIF image files which enable us to track your receipt of our marketing emails, how often you view our adverts or website pages, your location, IP address and browser information. Web beacons are activated whenever you open a marketing email or access a page on our website which contains a web beacon. Web beacons transmit data when you view them but are not capable of accessing any other information on your computer. Web beacons are not stored on your hard drive unless you download a GIF image containing them.

Some (but not all) browsers enable you to restrict the use of web beacons by either preventing them from sending information back to their source (for example, when you choose browser settings that block cookies and trackers), or by not accessing the images containing them (for example, if you select a 'do not display images (in emails)' setting in your email server).

How to opt in or out

See the section below entitled [How to accept or reject cookies](#)

Legal basis for processing: we process the information we gather from the use of web beacons in our legitimate interests (Article 6(1)(f) of the General Data Protection Regulation).

Legitimate interest: analysing the effectiveness of our email marketing campaigns. For further information on how we use the information gathered from our use of web beacons please see the section entitled Our use of automated decision making and profiling in our privacy policy.

Facebook Pixel

We use Facebook Pixel on our website. Facebook Pixel is a tracking code which allows us to track and monitor the success of advertisements we use on Facebook and to improve the effectiveness of those advertisements by recording information such as the device you used to access our website and the actions you took on our website using cookies. We may also use Facebook Pixel to create retargeting advertisements and custom audiences for our advertisements on Facebook and on our website.

Facebook aggregates data gathered from our use of Facebook Pixel on our website with data it gathers from other sources, in order to improve and target advertisements displayed on its website or via its services, to improve its systems and to provide measurement services to third parties which use Facebook's advertising services. You can find out more about how Facebook handles information they collect about you and other individuals by accessing their privacy policy, which is available here: <https://www.facebook.com/about/privacy>

Some browsers, such as Chrome and Firefox, allow you to change your settings to browse in 'incognito' mode, limiting the amount of data placed on your machine and automatically deleting any persistent cookies placed on your device when you finish your browsing session. There are also many third party applications which you can add to your browser to block or manage cookies.
