

Safari Guided Tour

Learning Objective

Students become more familiar with a range of animals around the safari; they will learn about adaptations and individual animals.

Summary of session

The guide delivering the session will interpret your journey sharing their knowledge of our animals and the different species we have. The tour is interactive allowing children and educators to ask questions and is sometimes illustrated with a range of animal artefacts. It lasts approximately 1.5-2 hours. There will be time to visit African Village and your group can either self guide for a set amount of time or have our guide take them round.
