

## Learning Objective

Students become more aware of the range of Longleat's conservation work. Students feel empowered to take actions themselves.

## Summary of Session

Students will learn and become more aware of what they can do to help local wildlife and the wider environment but also what Longleat is doing to help, here and around the world. Students will become aware of certain terms and key words which relate to conservation and the environment which can help future class work back at school.
