

SERVICES IN SUMMARY

Cybersecurity

Cybersecurity

Cybersecurity is at the heart of digital resilience, and at Glocomms, we specialize in securing top-tier talent to protect businesses against evolving threats.

With demand surging for experts in penetration testing, cloud security, and compliance, organizations face increasing challenges in hiring the right professionals. Our tailored recruitment solutions help businesses bridge the skills gap by connecting them with pre-screened, highly skilled cybersecurity professionals who align with their technical and security needs.

Whether you're scaling a security team, addressing regulatory compliance, or enhancing threat intelligence, we deliver permanent and contract hiring solutions to safeguard your organization in an ever-changing cyber landscape.

I worked with the Glocomms team in my previous position at a global bank to develop our cyber security and risk functions where they successfully hired 15 folks to help us build out the organization. When I moved to my new company and there was a need in our security organization, it was a no-brainer for me to reach out to Glocomms. They were extremely helpful and quick to make 3 security engineering hires critical for the firm within the first month of our renewed partnership.

Head of Technology & Product Recruiting,
Real Estate Data Analytics Firm
