

IPP proposals that did not progress to endorsement

This list includes all proposals that have not progressed to endorsement across all application rounds of the Infrastructure Priorities Programme (IPP). This may be because they were triaged out, withdrawn by the proponent, or assessed but not endorsed.

There are several reasons why applications can be triaged out, including insufficient information, proposing a project that is not infrastructure, or speaking to local rather than a national need – the IPP is for proposals with national significance. Projects that are already receiving funding are also ineligible for the IPP.

As a result, not progressing to endorsement does not necessarily mean that a proposal does not have merit.

Applicants can reapply in future rounds if they can strengthen their proposal and it seeks to address a nationally important infrastructure need.

List is alphabetical by applicant name. Proposals are only listed once.

Applicant name	Proposal name
AGMC Group New Zealand Aotearoa	National Battery Energy Storage Infrastructure & EaaS Platform
