

Harvest safe look out, look up

UK Power Networks distributes more than a quarter of the UK's electricity to London, the South East and the East of England.

A life can be lost within seconds if you come into contact with overhead power lines. Imagine the devastating effect this has on your family, friends and colleagues.

Long working days, warm weather and tiredness can often lead you to take shortcuts at work. Follow these simple safety steps **BEFORE** you start work to Be Bright – Stay Safe.

- **Contact UK Power Networks, or your local operator, to find out the location of cables on your land and mark them on your farm map**
- **Tell visitors and contractors where electricity cables are**
- **Plan your work - be extra careful when harvesting, ploughing, using irrigation pipes and long objects**
- **ALWAYS look up and check around when loading or unloading vehicles, stacking materials, using tipper wagons or trailers in fields**
- **Know the height of your machinery and any add-ons prior to starting work**

National power cut helpline

In an emergency call
0800 31 63 105 or simply 105

**POWER CUT?
CALL 105**
