SGN project reference: SOE15091

UK Power Networks project reference: Beddington to Addington

Dear Occupier/Customer

September 2026

Notification of collaborative electricity, water and gas works

We are writing to let you know that UK Power Networks, Thames Water and SGN are collaborating to undertake works.

Our priority is to minimise disruption to the area. This is why we will be delivering the upgrade works simultaneously, which also means one less set of works for residents and road users in the future.

Details of the works

- UK Power Networks – OCU will be working on behalf of UK Power Networks to undertake excavation and duct-laying works as part of our project to upgrade the underground electricity cable network between the Beddington and Addington substations, helping to maintain reliable electricity supplies for local homes and businesses.
- SGN –WCB Utilities will be replacing old metal gas mains with new plastic pipes This essential work will ensure that the community will continue to receive a safe and reliable gas supply.
- Thames Water – M Group will be working on behalf of Thames Water to complete essential duct works.

By working collaboratively, we are able to reduce the overall amount of time required to complete these essential utility works.

Location and timings of the works

UK Power Networks

The planned utility collaboration works will commence on the Purley Way junction of Waddon Road and Mill Lane from 5 October.To ensure the safety of the public, our operatives and to keep traffic flowing safely, it will be necessary to install temporary multi-way lights.

During the planned collaboration works, Waddon Road will be closed from the 5 of October for five weeks to allow for UK Power Networks to complete further upgrade works. A signed diversion will be in place, and access will be maintained residents and businesses.

Our planned working hours are 8am – 4pm, Monday to Saturday and 8am – 1pm on Sunday.

Thames Water

Thames Water will be carrying out essential duct work at the same time and in the same location as UK Power Networks.

SGN

Once UK Power Networks have completed their work, SGN will be working at Purley Way North West for one week before moving to Purley Way North East for one week. Multi-way temporary traffic lights will be in place to maintain the flow of traffic.

Waddon Road will be closed from 5 October for five weeks to maintain the compound area for UK Power Networks, Thames Water and SGN. A signed diversion will be in place, and access will be maintained residents and businesses.

Things to note

- If your property is within the area closed, access will be maintained for businesses and residents.
- If you have any specific requirements, please speak to the engineers on site.
- Please check with your bus provider to see If there are any changes to timings and stops.
- Please let delivery drivers and visitors know about the road closure.

Public information event

We are holding a virtual public information event on **30 September from 5pm – 7pm**. Members of the project teams will be present to answer any questions you may have.

You can access this event via the QR code. Alternatively, you can join us using the link provided on the project website:
