(Operations) Limited

20 October 2026

Dear Customer,

Update on final cable installation and permit extensions

UK Power Networks runs and operates the electricity network delivering power to your area. We would like to provide an update on our progress and apologise for the extension to some of our current permits, The project has experienced unexpected delays for work which is taking longer than anticipated.

In partnership with our contractor, JSM, we are currently working on the final stages of our project to install new underground electricity cables. This project is part of our continued investment in the network to ensure reliable power supplies for local homes and businesses.

This stage of our work is where we open an excavation to enable us to pull the new cables into the previously installed ducts and join them together at set intervals. This phase of the project requires large excavations known as 'joint bays' and you will see large timber structures around the openings.

Please note our team will work across multiple locations during this phase, so there may not be a full-time presence at each site. **Please see the table below for the latest permit extension details.**

For live updates or more information, please visit our webpage by scanning the QR code at the back of the letter or via www.ukpowernetworks.co.uk/chessington-to-kingston
