

unora

A close-up photograph of a person's shoulder and upper arm, positioned on the right side of the frame. The person is wearing a dark-colored strap with a patterned detail. The background is composed of horizontal wooden planks with a natural grain and some knots. The lighting is soft and directional, coming from the right, which highlights the texture of the skin and the wood.

Here for what matters

Welcome to Unora

We're here to redefine what's possible in stoma care – for people living with change and those who share our commitment to helping them live the lives they deserve.

Our portfolio of products and accessories are designed with protection and comfort in mind.

Combining innovative materials and decades of experience, our five material options make it easy to shape care to each person – whatever their needs and wherever they are on their journey.

And because care goes beyond the product itself, we're here, ready with guidance and support that helps everyone feel confident, every step of the way.

With Unora, you can focus on what matters most – delivering the best care to more people.

We're here for what matters.

Helping you find what matters, quickly

We understand the importance of choosing the right product for each individual.

This page highlights commonly used solutions, to guide you straight to the product you need.

New product range

Explore the future of stoma care

Introducing the only ostomy bag with skin-friendly silicone

Silkura® is the only silicone based stoma bag range and is designed to offer breathable adhesion, comfort and secure wear. Its silicone barrier allows airflow to help support the skin's natural moisture balance, while adapting closely to the skin to help create a secure seal during everyday activity. The flexible flange moves naturally with the body for a light, barely noticeable feel.

Closed bags in a discreet black design with soft textile cover. Flat baseplate, suitable for colostomy.

Find our Silkura® pouches on pages 22.

Alginate

Alginate infused hydrocolloid designed to help keep skin drier and more comfortable

Unora's Alginate baseplate is formulated with **15% alginate**, a naturally derived ingredient known for its moisture absorbing, soothing properties. As it absorbs fluid, it forms a soft, elastic gel that adapts to the skin surface — supporting comfort, adhesion and peristomal skin integrity.

With **up to 1.5 times greater moisture absorption** than standard hydrocolloids*, the Alginate range is ideal for:

- Moist or perspiration prone peristomal skin
- Skin prone to allergies
- Ulcerated or sore peristomal skin

Available options

Closed and drainable bags in beige and selected black styles.
Flat, low profile (3.5 mm) and soft convex (7 mm) baseplates.
Suitable for ileostomy and colostomy.

* Based on standardised laboratory testing showing up to 1.5 times higher fluid absorption compared to our standard hydrocolloid materials.

Here
for what
matters

Unora Home Delivery provides patients with a reliable and compassionate home delivery service for all stoma prescription products. As one of the UK's leading services, we supply the full Unora range alongside products from all major manufacturers, ensuring choice, continuity and confidence.

Unora Home Delivery®

Supporting patients

Our service has been designed around what matters most to people living with a stoma — ease, dignity and dependable support.

We offer:

- **Free, discreet home delivery** anywhere in the UK
- **Electronic Prescription Service** (EPS) or GP collection to streamline ordering
- Access to **Unora Clinical Nurse Specialists**, highly experienced in stoma care
- **Complimentary items** such as wipes, disposal bags and practical comfort essentials
- A dedicated **Customer Care Team** offering impartial support Mon–Fri

Virtual nursing service

For patients needing additional guidance, our Virtual Nursing Service offers secure video or telephone consultations with a Unora stoma nurse — ideal for follow up support, product advice, trouble-shooting and wellbeing conversations. It complements, not replaces, local NHS care.

Why Unora?

Built on decades of clinical expertise and a bold commitment to making care more human, Unora stands for clarity, dignity and genuine presence in a system that can often feel impersonal. We're here for what matters — to you, and to your patients.

Simple registration

Healthcare professionals can refer patients directly, or patients can register themselves by phone or email.

They will need:

- Contact details
- GP information
- Medical exemption reason (if applicable)

Freephone	0800 592 786
Email	priority@unorahomedelivery.com

Skin protection materials

Protecting peristomal skin is central to effective stoma care. Our portfolio includes a range of skin protection materials designed to support different skin needs and wearing preferences, making it easier to share care around the individual.

Silicone

Breathable silicone skin protection that combines gentle adhesion with a secure seal.

- Breathable barrier that helps maintain the skin's natural moisture balance
- Adapts closely to the skin's surface to help create a secure seal
- Moves naturally with the body for a light, barely noticeable feel

Alginate

Alginate-infused skin protection designed to absorb up to 1.5 times more fluid than standard hydrocolloids* for improved moisture management.

- Contains 15% alginate derived from natural seaweed
- Forms an elastic gel that adapts to any skin surface
- Helps maintain a balanced peristomal environment and supports comfort and extended wear time

* Based on standardised laboratory testing showing up to 1.5 times higher absorption compared with standard hydrocolloid materials. Data on file.

Primo hydrocolloid

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

-
- Two hydrocolloid layers bonded together to increase absorptive capacity
 - 0.4 mm thicker structure compared to standard hydrocolloid for enhanced adhesion
 - Thin, tapered border designed to adapt to uneven skin contours

Hydrocolloid

Used in our wound drainage products, this hydrocolloid provides skin protection with reliable adhesion and a secure seal to fit everyday needs.

-
- Established hydrocolloid formulation for dependable adhesion
 - Absorbs moisture around the stoma to help maintain a secure seal
 - Proven material technology widely used in everyday ostomy care

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

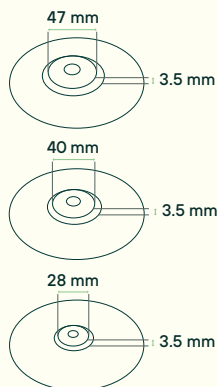

-
- Ultra-thin foil with a thickness of just 0.02 mm thick for improved discretion
 - Highly flexible design that adapts to body contours and movement
 - Suitable for active lifestyles

Convexities

Every stoma and body contour is different. When additional support is needed to help the stoma protrude and maintain a secure seal, convex baseplates can help create a more reliable fit.

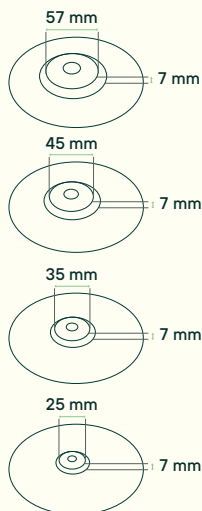

Our convex portfolio offers different convexity heights and plateau sizes, making it easier to match the right level of support to each person's needs.

Low Profile Soft Convex

Low Profile Soft Convex baseplates provide gentle support while maintaining flexibility and comfort. With a convex height of 3.5 mm, they help create a more secure fit while adapting naturally to the body's contours. Low Profile Soft Convex baseplates are available in three different plateau sizes.

Soft Convex

Soft Convex baseplates provide a deeper level of support when additional assistance is needed to help the stoma protrude and maintain a secure seal. With a convex height of 7 mm, they are designed to support more challenging stoma profiles while maintaining comfort and flexibility. Soft Convex baseplates are available in up to four different plateau sizes.

Available in Primo Hydrocolloid and Alginate materials, our Low Profile Soft Convex and Soft Convex options combine reliable adhesion with soft, flexible construction designed for comfortable everyday wear.

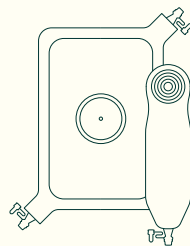

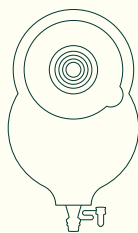

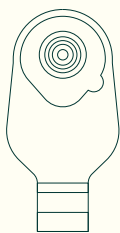

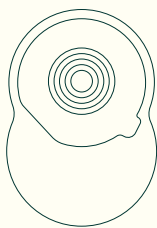

Product features

Our pouches are developed and manufactured in Berlin using modern production technologies and high-quality materials.

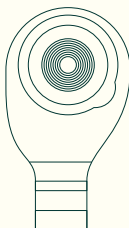

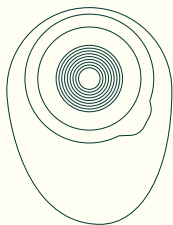

They are characterised by innovative and unique properties that meet the medical requirements of healthcare professionals and users.

Filter

- Colostomy – Activated carbon filter
- Ileostomy – MPC filter
MPC filter technology (Moisture Protect Composition)
= additional protective layer that prevents liquid absorption.

Window

All of our bags feature a window for easy positioning and observation. Our clear bags without cover/ window feature a crystal clear film, again for easy observation.

Colostomy

Unora colostomy solutions combine reliable filters, comfortable materials and skin-friendly barriers to help protect the peristomal area and maintain confidence in daily wear.

The Unora colostomy portfolio spans four skin protection materials that make it easier to shape care around individual anatomy, skin condition and lifestyle – whether supporting established routines or helping someone regain confidence after surgery.

Silicone

Breathable silicone skin protection that combines gentle adhesion with a secure seal.

Alginate

Alginate-infused skin protection designed to absorb up to 1.5 times more fluid than standard hydrocolloids* for improved moisture management.

Primo hydrocolloid

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

* Based on standardised laboratory testing showing up to 1.5 times higher absorption compared with standard hydrocolloid materials. Data on file.

Ileostomy

Ileostomy care often places greater demands on both products and skin. Higher output, moisture and frequent emptying mean that reliable sealing, skin protection and ease of use are essential.

Our ileostomy solutions are designed to support throughout the day. Advanced filter technology, secure closures and skin-friendly materials work together to protect the peristomal skin and help reduce leakage risk.

Our ileostomy portfolio offers a range of skin protection materials and pouch options to help adapt care to different anatomies, skin needs and daily routines.

Alginate

Alginate-infused skin protection designed to absorb up to 1.5 times more fluid than standard hydrocolloids* for improved moisture management.

Primo hydrocolloid

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

* Based on standardised laboratory testing showing up to 1.5 times higher absorption compared with standard hydrocolloid materials. Data on file.

Urostomy

Continuous drainage requires solutions that provide dependable flow while protecting the skin around the stoma. Comfort, security and simplicity are key in everyday urostomy care.

Unora urostomy solutions combine reliable drainage with flexible skin barriers and adaptability for drainage systems, helping protect the skin and maintain confidence.

Our extended urostomy range is shaped for maximum capacity with minimum bulk. The unique non-twisting pouch design allows for easier emptying. For the outlet, there is a flexible choice between a soft bung or tap closure for comfortable wear in everyday life.

Primo hydrocolloid

Dual-layer hydrocolloid technology engineered to enhance adhesion and security while remaining flexible and comfortable.

Microskin

Ultra-thin, flexible skin protection that adapts closely to the body and supports natural movement.

Starter pack

Clinic/ Community

Our Urostomy starter packs are perfect for supporting patients in finding the bag that suits them best. Available in all standard and maxi cut to fit closed bags, each pack contains 10 bags of the selected product.

Full instructions for use are included to provide guidance on application and removal, along with a sizing guide to ensure the bag wafer is cut to the correct size. The cover card details all the starter packs available and may be used as a reference tool to choose an alternative bag, if the initial one chosen does not suit the patient.

Pack contains

- 5 x Bags of chosen product
- 1 x Night drainage bag
- 2 x Connectors
- 1 x Belt
- 1 x IFU
- 1 x Product code information sheet

Products that are available to order as a starter pack are indicated in the product details on the following pages.

Please contact our customer service team on **0800 592 786** or email samples@unora.com to place an order.

Wound management

Some situations call for solutions beyond everyday pouching systems. Our specialised products help support safe and effective stoma management when standard options are not enough.

Our special supply range has been developed for medical professionals and offers specialised solutions that address these specific challenges, helping protect delicate skin, support clinical care and provide reassurance when it matters most.

All our wound managers come with the option of a port, enabling easy access to the wound.

Accessories

Good stoma care extends beyond the pouching system itself. Small details – protecting the skin, improving adhesion or supporting comfortable wear – can make a meaningful difference in everyday life.

Our accessories bring together practical solutions designed to complement pouching systems and support peristomal skin health, helping create a reliable and comfortable foundation for daily stoma care.
