

Local Authority Common Ask Introduction

Thank you for agreeing to provide data from your LAEP for Networks to understand how your LAEP plans impact plans in your area. This document pack contains two folders, which outline how to prepare data for the different Networks interested in using your data to inform their planning.

Effort has been made to minimise the difference between these Local Authority Common Ask, with the intention of minimising the amount of additional effort required to prepare data for multiple audiences. For example, for heating technologies for individual buildings, the formats are very similar and only differ in the technologies considered. However, due to differences in how Networks use your data, some unavoidable differences do exist between the formats needed for the two dictionaries, so caution is advised to make sure that the data prepared aligns with the format required for the specific technologies.

The technologies captured by different templates are as follows:

■ Local Authority Common Ask - Electricity

- District Heating
 - Waste Heat
 - Heat Pumps
- Heat Pumps, Resistive Heating and Biomass (HP, RH and Biomass)
 - Domestic and I&C ASHPs (ATA and ATW)
 - Domestic and I&C GSHPs
 - Domestic and I&C Hybrid Heat Pumps
 - Domestic and I&C Electric Resistive Heating (Day and Night)
 - Domestic and I&C Biomass
- Domestic Thermal Efficiency
- Small Solar PV
- Electric Vehicles

■ Local Authority Common Ask - Gas

- District Heating and Individual Heating (Domestic and I&C)
 - Hydrogen
 - Biomethane
 - Natural Gas
 - Blended Hydrogen and Natural Gas
 - Blended Biomethane and Natural Gas
 - Blended Hydrogen and Biomethane
 - Blended Hydrogen and Biomethane and Natural Gas
